Lopez, Quezon Campus

LEVEL III ACCREDITATION SURVEY VISIT
BACHELOR OF SCIENCE IN BUSINESS ADMINISTRATION
MAJOR IN MARKETING MANAGEMENT

AREA VIII
PHYSICAL PLANT AND FACILITIES

COMPLIANCE REPORT

ACCREDITING AGENCY OF CHARTERED COLLEGES AND UNIVERSITIES (AACCUP)

Program : **Bachelor of Science in Business Administration major
in Marketing Management**

SUC : **POLYTECHNIC UNIVERSITY OF THE PHILIPPINES**

Branch/Campus : **LOPEZ, QUEZON CAMPUS**

Date of Last Visit : July 4-8, 2022

Present Accreditation Status : Level II Accredited

COMPLIANCE REPORT

AREA: VIII – PHYSICAL PLANT AND FACILITIES

AACCUP Recommendations	Action Taken by Host/Program	Percentage of Compliance	Proof/Evidence
1. Earthquake and fire drills and other disaster and risk reduction be periodically conducted. This is to ensure the mindfulness of the general populace in cases of emergencies.	- The institution maintains active communication by issuing official notices to the stakeholders, including faculty, staff, and students regarding the schedule of upcoming earthquake and fire drills. - The drills are conducted in collaboration with the Bureau of Fire Protection (BFP) and local DRRM Councils. - Alongside the physical drills, the institution facilitates briefings on "Duck, Cover, and Hold" protocols and fire safety, ensuring that every individual is mindful of their specific role during an actual emergency.	100%	https://drive.google.com/drive/folders/1bdu1idJyUGXBNrZ5EJ_k0SziDSigGgwd?usp=sharing
2. Conduct of pest control and inspection activities to all school facilities is recommended to minimize and/or avoid the untimely dilapidating of the university's properties. The maintenance unit of the university may periodically subject all school facilities to pest control. It is suggested that said pest control activities be properly documented.	- The University Maintenance Unit, in coordination with the Campus Administration, established and implemented a Pest Control and Facility Inspection Schedule across all school buildings, offices, and classrooms. - Partnered with external pest control service provider / utilized trained maintenance personnel to conduct comprehensive treatments targeting termites, rodents, and other destructive pests.	100%	https://drive.google.com/drive/folders/1QXfBLOzZv8sHKJ_zAv7p9yT03Mrmip58?usp=sharing

3. The institution may provide enough hand-washing facilities in the canteen to help ensure hand hygiene for everyone.	• The institution installed additional permanent hand-washing facilities within and around the canteen area. These stations were strategically placed to be easily accessible to all students, faculty, and staff before and after meals. • Instructional signage on proper hand-washing techniques was posted at each new station. This serves as a constant visual reminder to the general populace about the importance of hygiene in preventing the spread of foodborne and infectious diseases. • The administration ensured that these facilities are connected to a reliable, continuous water supply and are regularly replenished with liquid soap and hand-drying materials through a maintenance schedule.	100%	• Pictures of hand-washing station
4. With the recent, unexpected, and abrupt change in the Institutional set-ups, the College may consider a leapfrog budget increase in ICT and its peripherals, to cope with the "new normal."	• Recognizing the critical shift in the institutional setup due to the "new normal", the institution successfully procured and installed brand-new, high-specification computer units in two (2) dedicated ICT laboratories. This ensures that students have access to hardware capable of running the latest software required for Marketing and Business Administration. • Alongside the new computer units, the institution upgraded ICT peripherals, including improved server capacities, and multimedia tools to facilitate seamless blended learning and digital collaboration. • The deployment of these upgraded facilities serves as a tangible response to the abrupt change in educational delivery, ensuring the program is fully equipped to meet modern digital demands and academic standards.	100%	https://drive.google.com/drive/folders/1J-OAqfTQF0UqU_cgh3LXi4i7YbgbmZph?usp=s_haring
5. Medical supplies and other paraphernalia may be increased in volume and number to	• Conducted a comprehensive audit of the campus clinic inventory to determine baseline consumption	100%	

account for future use, considering the significant role it plays in the health and safety of the administration, faculty, staff, and students.	- rates and identify critical medical supplies requiring volume enhancement. - Based on the audit findings, the medical office formally prepared and submitted an official request for an additional volume of medical supplies and first-aid paraphernalia to meet the projected needs of the campus. - Procured the requested expanded volume of essential medicines, emergency paraphernalia, and health kits to establish a secure buffer stock for future institutional use.		https://drive.google.com/drive/folders/1hmJzl4eqYaA43HJym8GWI2GdmmKjMIsc?usp=sharing
6. Availability of functional drinking facilities with sufficient supply of potable water is suggested. This allows students easy and reliable access to potable water as needed.		100%	
7. The approved schedule for the cleaning of utility workers is recommended to be visible and an accomplishment report should be provided; posting and monitoring of student cleaners in the classroom is also recommended. Utility workers are to wear safety gear while doing cleaning activities like that of the CRs.	- Formulated and conspicuously posted the approved Utility Personnel Cleaning Schedule in strategic, high-visibility areas. - Implemented a strict accountability system requiring utility personnel. - Enforced the mandatory use of Personal Protective Equipment (PPE) and safety gear for utility workers during high-risk sanitation activities, particularly in comfort rooms.	100%	https://drive.google.com/drive/folders/1UEmVHXIzUa8VY1FQTAySV5oM7oXAASeU?usp=sharing
